Airport Certification Information Bulletin 2009-04

The Airport Cooperative Research Program (ACRP) has recently published a synthesis of airport practice on “Preventing Vehicle – Aircraft Incidents during Winter Operations and Periods of Low Visibility”. This study is intended to inform airport operators about factors affecting safe winter operations and the prevention of runway incursions by airport snow removal equipment operators. The information contained in this report can be of value to airport operators in their efforts to provide a safer operating environment when engaged in snow and ice removal operations during normal and low visibility conditions.

This study is available at: http://www.trb.org/news/blurb_detail.asp?id=9799
